

Monedero

NEW CYLINDER HEADS LAUNCHED

NEW IN STOCK

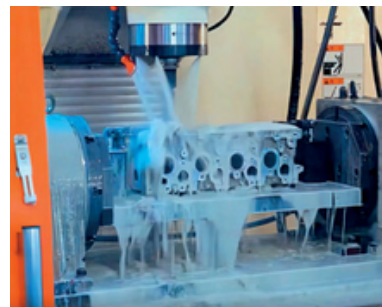

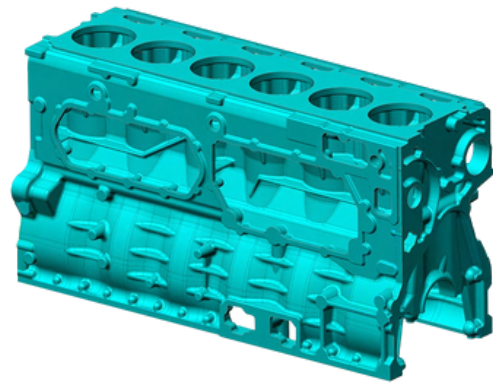

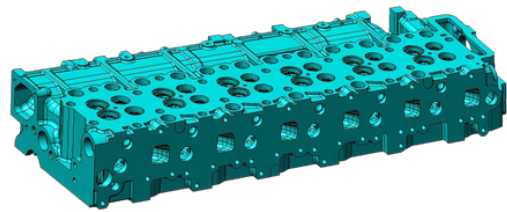

2024

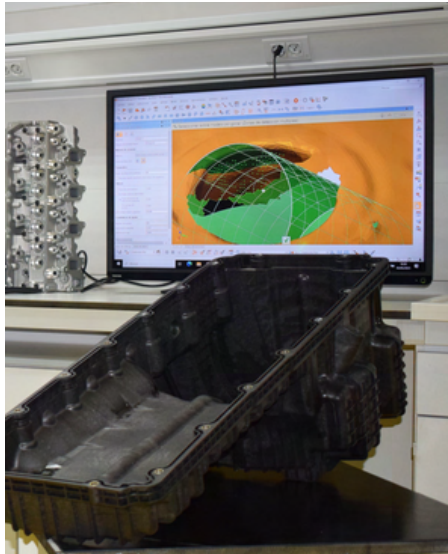

We develop for you

- Our engineering department continually receive training on cutting-edge topics in the different sectors in which we work, but it also dedicates a large part of its time to studying ways of improving products, processes and services.
- We partner with specialised entities in the sector world-wide that help us improve in all aspects of reverse engineering, facilitating the development of products with Monedero's guaranteed quality.
- Our experience and knowledge of the market, together with extensive investment of resources in Research, Development and Innovation (RD&I) are the perfect combination for Monedero to continue to play an important role in the electromechanical sector at an international level.

Quality and logistics

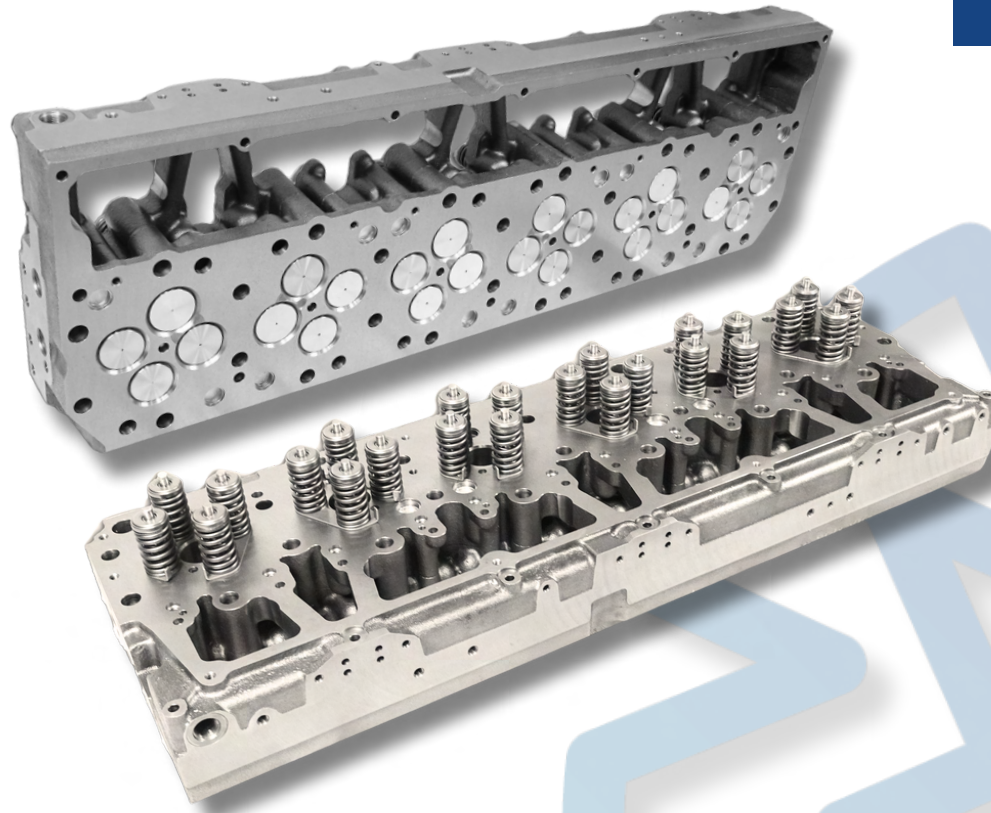

- We conduct rigorous studies with the newest technologies and machinery in the sector, to determine the parameters that make our products unique components for your vehicle.

- We have a modern and efficient management of our distribution, using tools and new technologies that transform the warehouses into an intelligent logistics centers, resulting in a reduction in customer waiting times and an increase in efficiency globally.
